4. Latihan 05

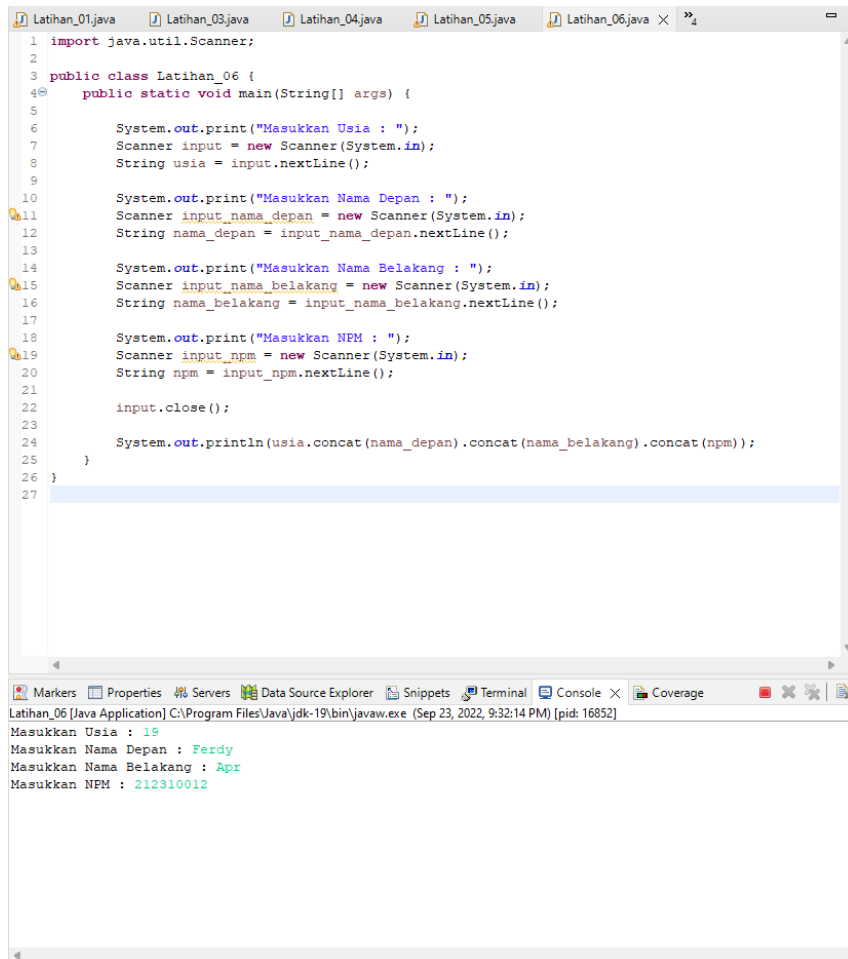

The screenshot shows an IDE with a Java file named `Latihan_05.java`. The code is as follows:

```
1 import java.util.Scanner;
2
3 public class Latihan_05 {
4     public static void main(String[] args) {

8. Latihan 09

The screenshot shows an IDE with a Java file named `Latihan_09.java`. The code defines a `Students` class with attributes `npm`, `semester`, `fullName`, and `gpa`. It includes five getter methods: `getNPM`, `getFullName`, `getClassName`, `getSemester`, and `getGPA`. A `main` method in the `Latihan_09` class creates a `Students` object and prints its details using the getters.

```
1 class Students {
2     int npm, semester;
3     String fullName, className;
4     float gpa;
5
6     int getNPM(int paramNPM) {
7         npm = paramNPM;
8         return npm;
9     }
10
11    String getFullName(String paramFullName) {
12        fullName = paramFullName;
13        return fullName;
14    }
15
16    String getClassName(String paramClassName) {
17        className = paramClassName;
18        return className;
19    }
20
21    int getSemester(int paramSemester) {
22        semester = paramSemester;
23        return semester;
24    }
25
26    float getGPA(float paramGPA) {
27        gpa = paramGPA;
28        return gpa;
29    }
30 }
31
32 public class Latihan_09 {
33     public static void main(String[] args) {
34         Students myBio = new Students();
35         System.out.println("NPM : " + myBio.getNPM(212310012));
36         System.out.println("Nama Lengkap : " + myBio.getFullName("Ferdv Aprilivanto"));
```

The output window shows the following results:

```
<terminated> Latihan_09 [Java Application] C:\Program Files\Java\jdk-19\bin\javaw.exe (Sep 23, 2022, 9:33:55 PM - 9:33:55 PM) [pid: 6204]
